

Matt Shade

AI ENGINEERING DIRECTOR | ENGINEERING LEADERSHIP | DESIGN ENGINEERING

Engineering & design leader. I build consumer platforms, scale teams, and apply AI to solve real workflow problems.

hellomattshade@gmail.com | <https://www.mattshade.com/> | <https://linkedin.com/in/matt-shade-66125515>

SUMMARY

Hands-on engineering and design leader with experience building scale consumer platforms and technical teams. I bridge the gap between engineering, design, and product to move quickly from high-fidelity prototypes to scalable systems that drive real business impact.

SELECTED IMPACT

- Scaled high-performance engineering teams, hiring the managers and engineers needed to drive subscription growth and platform delivery.
- Consolidated 8 disparate video players into 2 standardized systems, cutting down technical debt and years of operational overhead.
- Led the retirement of a massive monolithic legacy application, saving significant costs and reclaiming thousands of engineering hours.
- Built custom GenAI agents that solved real newsroom problems, from on-air scheduling to complex newsgathering logistics.
- Launched AI-enablement programs (hands-on workshops and technical office hours) that helped teams actually adopt agentic tools into their daily work.

EXPERIENCE

Director of AI Engineering

NBCUniversal · New York, NY · Jul 2025 - Apr 2026

- Lead AI and agentic workflow strategies across the NBC News Group, building a unified approach for intelligent automation.
- Collaborate with editorial, product, and design directors to speed up experimentation and unblock development teams.
- Built custom agents to automate newsroom tasks, helping on-air producers save hours on scheduling and logistics.
- Established hands-on AI workshops and office hours, teaching teams how to use tools like Cursor and ChatGPT in their daily work.
- Drive the architecture for AI discovery tools and personalization engines using React, Node.js, and AWS/GCP.

Director of Engineering, NBC News Group Digital

NBCUniversal · New York, NY · Oct 2021 - Jul 2025

- Built and managed high-performing teams, hiring the engineering managers and senior staff needed to scale the subscription business.
- Led the consolidation of video player tech, moving from 8 different implementations to 2 global systems to reduce complexity.
- Retired a massive legacy monolith, saving overhead costs and freeing up hundreds of engineering hours for new features.
- Modernized web and mobile apps by migrating legacy code to React and TypeScript with modern CI/CD pipelines.
- Focused on building an inclusive engineering culture, resulting in high retention and a better environment for developer growth.

Senior Engineering Manager

CNBC · Englewood Cliffs, NJ · Sep 2015 - Oct 2021

- Technical lead for interactive features on CNBC.com, building high-traffic tools that stayed stable during peak market volatility.
- Designed subscription workflows and data visualization engines that directly increased user engagement and conversions.
- Worked with product and design to build high-fidelity prototypes that shaped the direction of core editorial products.
- Built experimentation frameworks for reliable A/B testing on multi-million user flows.
- Mentored junior and mid-level engineers on system architecture and front-end engineering standards.

Senior Interactive Designer

CNBC · Englewood Cliffs, NJ · Jan 2007 - Sep 2015

- Designed and built award-winning interactive experiences, serving as the bridge between visual design and technical execution.
- Introduced prototype-driven discovery at CNBC, creating web and iOS interfaces that saved months of engineering rework.
- Developed deep expertise in interaction design, animation, and iterative product development.
- Created the design systems and UI libraries that ensured consistency across CNBC's digital news features.

SKILLS

- AI Engineering Leadership
- Engineering Management
- Hiring & Team Building
- Mentorship
- Agentic AI & Custom Agents
- ChatGPT
- Gemini
- Cursor
- GitHub Copilot
- Microsoft Copilot Studio
- JavaScript
- TypeScript
- React
- React Native
- Node.js

- PHP
- GraphQL
- GCP
- AWS
- HTML
- CSS
- Docker
- Design Systems
- Experimentation
- Interaction Design
- CI/CD
- Figma
- Photoshop
- Illustrator

EDUCATION

Mount Ida College

Associate of Arts, Graphic Design

Katherine Gibbs School

Associate of Arts, Visual Communications
